Installation Guide

1. On Discord create the channels for **Player Rank, Player PVP Rank, PVP, Bases-Seized, Supplies, Server Info, Killfeed, Chat** (Note: you can choose which ones you want.)

2. For each channel go to **Edit channel > Integrations > Webhook** and create one.

3. Copy the **Webhook Url** put it on a text file and remove the first part of the link
   https://discord.com/api/webhooks/

```
KillFeed - https://discord.com/api/webhooks/3252793321730478080/iu74blk62IAbuUp6bBP3CZFE5essByUJXkI1fUa9l5Pe
PVP - 1352793321730473000/o74bblk62IAbuUp6bBP3CZFE5essByUJXkI1fUa9l5PekzUpXVNX05w2SGoNu78Dzhge
Supplies        id                                                    token
....
```

4. Install mod on server config file.

```
{
    "modId": "64C4C79C66472DE8",
    "name": "DISCORD_MOD",
    "version": "2.0.14"
}
```
   *Always check latest version

5. Restart the server.

6. Go to **profile/profile/** folder and you will see **4** configuration files.
   IMPORTANT NOTE: **Don't** use **Notepad++** to edit the files.

- discord_premium_channels.json
- discord_premium_config.json
- discord_premium.json
- discord_pvp_killfeed.json
- discord_status_chat.json
- discord_supply_bases.json

7. Open each file in the browser or use Microsoft Studio Code.

/ home / container / profile / profile / discord_supply_bases.json

{"supplyChannel":"1354150347983028324/82EfRVcWnBL4BE1QFCZ25-c-IJI3r45de3csKHjOKF1KKi-xc3XduIFyi0CpZ3qb","baseChannel":"1354150347983028324/82EfRVcWnBL4BE1QFCZ25-c-IJI3r45de3csKiJJJHjKKi-xc3XduIFyi0CpZ3qb"}
